

CorrespondenceData

```
graph BT; FaceCorrespondenceData --> CorrespondenceData; PointCorrespondenceData --> CorrespondenceData;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'CorrespondenceData'. Below it are two boxes: 'FaceCorrespondenceData' on the left and 'PointCorrespondenceData' on the right. A horizontal line connects the two bottom boxes, and a vertical line with an upward-pointing arrow connects the center of this line to the bottom of the 'CorrespondenceData' box, indicating inheritance.
